Application/Control Number: 10/620,721

Art Unit: 2815

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 2,5, 7, 8, 9, 10, 11, 14, 15, 17, 18, 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kurtz et al ( '445).

Kurtz et al shows a first chip 12a-12e having first and second opposing sides and pads 18 formed thereon. Said pad 18 is shown connected to a pad on a second opposing side by way of a via. A first second and third chips are taught each form in a cavity or cutout 50 formed in each layered on each subsequent chip. Each chip can be seen formed electrically interconnected with a conductive via interconnect ( see figure 1) and forming pads on an exposed surface ( see figure 1, top figure).

It would have been considered obvious to one having ordinary skill in this art to form bumps on the exposed surface of pad surfaces to provide for external electrical connection and bumps are typically accessed with probes for test access and used at test points. To therefore provide these bumps as test access points would be therefore well known.

Chips 12 are shown in flip chip format.

As the claims fail to specify how thin is thin or what constitutes "thinned" in the claims the chips of Kurtz et al are deemed to be thinned.

Art Unit: 2815

Claim 9 contains a method of making characteristic (i.e. electroless deposition) given no patentable weight in determining the patentability of the final device structure.

The stack of Kurtz et al is shown as a unitary body and is therefore deemed to be together in a single package.

Claims 1, 2, 5, 7, 8, 9, 10, 11, 14, 15, 17, 18, 19 are rejected.

Claims 3, 4, 6, 13, 16, 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication should be directed to S. V. Clark at telephone number (571) 272-1725.

S. V. Clark
